

Sydney Jenkins is a Senior Data Scientist on Verizon's Network Capital Management team, where she uses mathematical optimization to help plan the future of the company's cellular network. She joined Verizon in early 2024, first working with the Artificial Intelligence & Data organization to provide competitive market intelligence to business leaders. Prior to Verizon, Sydney gained diverse experience in program and customer experience management through a rotational Leadership Development Program.

A two-time Rutgers graduate, Sydney earned her Bachelor's in Mechanical Engineering in 2022 and a Master of Business and Science in Engineering Management in 2024. In her free time, you can find her baking, at the gym, or

diligently maintaining her Duolingo streak. She's always happy to connect with fellow members of the Rutgers community!
