

tinker with his 3D printer and Raspberry Pis.

Joe Baratelli is an Associate Director at Verizon with a career that shows how you can move between different parts of the tech industry. He started out in small business IT, then got into investment banking data centers, and later worked at AT&T Labs. This diverse back ground brought him to Verizon in 2013, where he now focuses on areas like Femto cell, virtual infrastructure, IOT, and messaging. What's cool is that he's also a contributor to a pending patent, which shows his passion for inventing new things.

When he's not at work, he's a dedicated dad who spends his time at his kids' events, from skiing and quarter midget racing to ballet and Jiu-Jitsu. He also loves to build and
