The text is about the Rutgers School of Engineering and a graduate student, Caillin Ryan, who is pursuing a Master of Materials Science and Engineering. The text includes questions and answers about the student's motivation for pursuing a graduate degree, their choice of Rutgers School of Engineering, their favorite class, the impact of a professor, their research projects, and their plans after graduation. The text also highlights the unique advantages of New Jersey as a state for higher education, with its high density of PhDs per square mile and significant contributions to research in various fields such as fighting cancer, underwater drone technology, smart city testbeds, and global forecasting. The text ends with comments from Christopher J. Molloy, Ph.D., Chancellor of Rutgers University-New Brunswick, which emphasize the university's ranking and commitment to excellence in research and education.
