Dear SOE Students,

Chem 2 is required for all SOE majors (except for ECE). There are NO SUBS for Chem 2. Please include Chem 2 in your schedule planning for summer, fall, or spring. In the summer or fall, you can take 160:162 in place of Chem 2. Please also note that Chem recitation is NOT a replacement for Chem lab (160:171).

Leaving a 1st year course (like Chemistry or Expos) for senior year is a bad idea. Exceptions for these cases will NOT be made.

Also, if you are interested in taking a summer course outside of RU, review this webpage and submit the necessary documents prior to taking the course: <http://soe.rutgers.edu/oas/transfer-courses>. Last note, if there is a pre-requisite for the summer course that you are taking right now, you must pass it for the summer course authorization to be valid. If you do not pass it, and go forward with taking the summer course, the transfer credits will not be accepted.

Have a great day.

Dear SOE Students,

As you are completing your registration for the spring, please keep in mind that Chem 2 is required for all SOE majors (except ECE) to get a degree. There are NO substitutes for Chem 2. 1st yr students: If you plan to choose ECE as your major, but aren't quite sure yet, if you take chem 2 it will count as a math/sci/eng'g elective in the ECE curriculum.

Have a great day.
